

I am in full support of Docket # 02-278, (Do not call act). I already belong to Wisconsin's "Do no call list" and look forward to a national list. Privacy is becoming a more important issue every day. I have elderly people in my family that have been victimized by telemarketers that want donations or vital information. As much as elderly people are told not to give out information or money to these telemarketing businesses, they still do. I believe by having a national do not call list, more people will be protected from dishonest businesses.

Another reason for my support of Docket # 02-278 is the fact that most of these calls are very annoying. I have heard the argument by businesses that this will hurt them. I believe that protecting the public is more important. In a free society the public should have the ability to stop harassing phone calls. In the past some of these calls just keep on coming in. It is comforting to know that the Federal Government is doing something to help out the common citizen. This new law will go a long way to protect our privacy and our quality of life at home.

Thank you,

Kevin Doran
